

FIG. 1.—Specimens 2 (top left), 21 (top right), 9 (bottom left), 6 (bottom right), all of Group 1 (sub-group with stained matrix). 2 is pale grey with “glassy” inclusions. 21 is creamy with yellowish blotches, 6 is brown with whitish to yellow blotches, and 9 is medium brown to grey.

FIG. 2.—(a) Specimen 21, showing weathered skin formed over shaped fragment (visible and outlined only on left half of specimen, where sawn for thin section). (b) Specimen 9, showing original weathering skin (lower right) partly removed by working.
