

ACKNOWLEDGMENTS

The work described was planned and its initial stages carried out with the assistance of the late Rev. F. H. Robertson.

The generous help of the following is gratefully acknowledged: Dr Robert A. Falla, Dr Charles A. Fleming, Winifred M. Fleming, Dr John E. C. Flux, Juliet M. Fulton (now Mrs A. Gemmell), Dr John A. Gibb, Dr William H. Marshall, Diana P. Orwin, Christopher Robertson, Rowland H. Taylor, David Ward and the late J. S. Watson. Mr S. N. Beatus, N.Z. Geological Survey, took some excellent photographs in 1957 and 1964 without which the census would not have been possible.

I would like to thank Dr Falla for supplying some valuable historical records and Mr Thomas L. Grant-Taylor for information on the geology of Cape Kidnappers and the Black Reef. I am grateful to John E. C. Flux for reading a draft of this paper and for his helpful suggestions. Also I am very grateful to Dr Hamish R. Thompson, Director, Applied Mathematics Laboratory, D.S.I.R., for assistance in analysing some of the data.

The permission of the Cape Kidnappers Sanctuary Board for the use of their hut is gratefully acknowledged.
