

the Marine Party, for his constant encouragement and advice during the expedition, and to Dr M. C. Miller of the same institution and a fellow expedition member for subsequent encouragement and help with this work. I am grateful to Mr J. Schenck and Mr I. Gower for making their respective homes in the B.S.I.P. available to me during this work. Mr J. Grover, the then Director of the B.S.I.P. Geological Survey Department, made the Komimbo Bay section of the work possible by generously providing me with a vehicle from his Department. I would like to thank Mrs M. Borowska of the University of Auckland Library for translating Marcus and Marcus (1954).
