

ACKNOWLEDGMENTS

I record my grateful thanks to Mr J. Moreland, Dominion Museum, Wellington, for his valuable advice and assistance and for identifying so many of the species and for arranging the checklist in biological sequence. Dr R. R. Forster, Otago Museum, Dunedin, Mr P. Castle, Victoria University, Wellington, and Mr H. J. Robins, Waitaki Boys' High School, Oamaru, have each identified some species, and I sincerely thank them for the time they have spent on my behalf. I am again indebted to Prof. H. B. Fell, Victoria University, Wellington, for his continued encouragement, advice and constructive criticism. I am particularly grateful to those Oamaru fishermen who have so willingly brought uncommon species ashore for me and to the management of the local fish depot for allocating temporary freezing space.
