1. If only even numbers are on one side of the street, the lowest number would be 250.

2. Ten seconds. The interval between strokes is one second and there are ten intervals.

3. Thirty-six years.

4. No.

5. 1 ft. 7 in. (approximately).

6. He fills the 3 gal. dipper, pours 3 gals. into 5 gal. dipper; fills 3 gal. dipper and pours 2 gals. into 5 gal. dipper, leaving 1 gal. in 3 gal. dipper; empties 5 gal. dipper into 8 gal. dipper; pours 1 gal. from 3 gal. dipper into 5 gal. dipper; fills 3 gal. dipper from 8 gal. dipper, pours it into 5 gal. dipper which now holds 4 gallons, similar to

8 gal. dipper. Milkman then either goes "dippy" or buys new measures.

7. 4 hrs. 20 min.

8. Nine byes; twenty-two games.

9. The ton of sixpences. Assuming a sixpence to be half as heavy as a shilling, you would have four times as many sixpences as shillings, so that a ton of sixpences would be worth twice as much as half a ton of shillings.

10. Neither. The relative velocity of the trains is the same in each case so that they take the same time to pass each other completely. The driver of the express has to travel past a train 200 yards long while the driver of the goods train has to pass a train only 110 yards long. Since their relative speeds are the same, the answer is: the driver of the goods train.
